I don't think anybody wants to try the experiment in this or any other State. Cleveland is no more a free trader than I am. He simply wants to bring taxation within the limit of the government's needs, and the party which resists such a proposition will be ground between the upper and nether millstones at the next presidential election." The Senator has usually been classed as a protectionist.

BIG O. little o, Stealey, the Washington correspondent of Watterson free trade paper, interviewed Congress man Bankhead, of Birmingham, (Ala.,) District, at Washington the other day and got the following black eye; Bankhead said: "I will not oppose the passage of a bill which will give to the country the necessary relief from the burdens heaped upon the people by the present tariff laws. There are some things in the President's message that may be considered two sweeping. "THE story of lynching of three negroes near Obion, which was sent to the New York Herald and published all over the country was a canard. It was sent by a bright but erratic rover representing the Herald, and who while in this office received a telegram from that paper to send them account of a lynching. To obey orders he manufactured it and sent it along.

The above paragraph is taken from the Obion Democrat, and the greatest error that the person who wrote it made, was in not giving the liars name. It should be printed by all means in order that other newspapers, and honest people could be protected from such cattle. Tennessee fied. has an uneviable name abroad on account of the killing record that is somewhat true, but when it comes to a scurrillious scratcher from a distance entering her borders and lying about her people, endurance ceases to be a virtue. Such men should be cures and drives malaria and fever I think a sign should be put over them tarred, feathered and whipped out of any town.
